So you've decided to pursue a PMI certification. Congratulations on this important decision, ProMethIt Consulting can help you achieve your goal starting today! PMI's Project Management Professional (PMP)[®] credential is the most important industry-recognized certification for project managers. Globally recognized and demanded, the PMP[®] demonstrates that you have the experience, education and competency to lead and direct projects. This recognition is seen through increased marketability to employers and higher salary; according to the PMI Project Management Salary Survey—Seventh Edition, certification positively impacts project manager salaries. Courses are conducted by experienced Certified PMP[®]s and focus on both factual knowledge and situational analysis.

Our Project Management Professional Course will introduce you to best practices as set forth in the Project Management Body of Knowledge (PMBOK Guide – 5th Edition) published by the Project Management Institute (PMI). Each student is expected to have both a suitable background in Project Management fundamentals and practical experience. We recommend reviewing the information about the certification requirements on the PMI web site prior to registering, www.pmi.org
